RE: Astronomy Club

Dear Parent,

I am writing to inform you that the next astronomy club will be held during national science week on **Wednesday 13th March**. The club is open to pupils, parents and friends.

The evening will begin at 7.00pm and will be led by Michael Kimber who leads on science education in the school. There will be an opportunity to look through some telescopes on the school field (weather permitting) and to experience a range of other astronomy activities. The club will finish at approximately 9.00pm.

If you have a telescope at home that you would be happy to bring in then please do – it would enable more people to look through telescopes and, as there will be experienced astronomers at the club, they would be very happy to give you some tips for using the telescopes to their potential.

The evening is designed as a family event and as such, parents must accompany their children and stay for the evening.

We will be serving some refreshments from the café in the hall and are wishing to have parent volunteers help in the serving of this food. We will be serving hot dogs, tomato soup and crisps. If you are able to help volunteer with the refreshments or have any questions regarding the evening please contact Michael via email michael.kimber@tcat.education

Spaces are limited so please book via Eventbrite [here](#) as soon as possible.

Yours sincerely,

Jonathan Bishop
Executive Headteacher
