RE: Research Project – Riding a Bike

Dear Parent,

We have agreed to take part in a research project being undertaken at Oxford Brookes University looking at how children learn to ride a bike. Parents/carers of children between the ages of 6 – 10 years who can cycle independently are eligible to take part. This will involve completing a short (10 minute) questionnaire to explore a range of factors that might influence how children learn.

If you would like to take part, please follow the link [here](#)

The findings of the research project will be shared with the school in the summer.

Yours sincerely,

Jonathan Bishop
Executive Headteacher
